

## **TACHOMETER TESTER**

### **Model 1921**

The Model 1921 Tachometer Tester is used for the testing and calibration of electrical and mechanical tachometer generators and indicators. Two variable speed brushless motors eliminate the need for gears while providing for a testing range of 10 to 50,000 RPM. Each motor/shaft is controlled by closed loop system utilizing hall/encoder feedback and a digital motion control card. The result is a very reliable system with a speed accuracy of 0.005%.

The control panel consists of a LCD backlit display with keypad entry, illuminated power switch, emergency stop button and a shaft rotating indicator.

- 10-50,000 RPM Actual Drive Speed
- High accuracy
- 0.01 Display Resolution
- Direct Drive
- Bi-directional
- Keypad entry with LCD display

# SPECIFICATIONS

<b>Model 1921</b>	
Drive Type:	Direct Drive Brushless Servo
Number of Drives:	2
Drive Outlet:	Ø0.25 inch.
Shaft Speed Range:	Total Range: 10-50,000 RPM Bi-directional Shaft A range: 10-5,000 Shaft B range: 5,000.01-50,000
Dimensions:	15.7W x 14.7D x 7 H in.
Approximate Weight:	35 lbs. (16Kg)
Digital Display:	RS-232 • Accuracy • Units • Resolution
Shaft Speed Stability	0.1% (10-190 RPM) 0.005% (200-50,000 RPM)
Power Requirements:	115VAC, 50-60 Hz, 6.25A; 230VAC Optional
Operating Environment:	• Temperature • Relative Humidity
Storage Environment:	• Temperature • Relative Humidity
Shipping Environment:	• Temperature • Relative Humidity • Altitude Maximum
Protective Shield	Polycarbonate shield mounted above motor shafts
Front Panel Controls	Illuminated Power Switch, Keypad/Display, Emergency Stop, and Shaft Rotating Indicator
Adapter Wheels	60° Cone Wheel, 90° Cone Wheel, 60° Countersunk, 90° Countersunk, Linear Speed, Photoelectric
Recommended Calibration Interval	1 Year

## Buyers Guide

Model Number	Part Number	Description
Model 1921	230440-2	115Vac, 50/60 Hz
Model 1921	230440-3	230Vac, 50/60 Hz

<b>Accessories and Options</b>	
Part Number	Description
230440-909	Calibration Kit for 1921
